Patient's Study Participant Number:

Sampling Instructions

- The research team will inform you of the planned sample collection on the day
- Avoid suctioning or using saline washes: 1 hour before if patient has **high secretion load** or 2 hours if patient has a **low secretion load**
- Sample collection should be at least 1 hour clear from nebuliser therapy or saline washes
- If suctioning is **clinically indicated please continue** and inform the research team who will delay collection

| Collection Day | Date | Planned collection time | Avoid routine suctioning for: | Sample collection | Planned reattempt time | Sample Collection | Send to |
